

RS.aero is hiring

Design Engineer (m/w/d)

We offer:

- self-reliant work in dynamic development and research projects
- a future-oriented job with a long-term contract
- equal pay and development opportunities
- flexible working hours with a flexitime account system

in a modern and innovative, family-run medium-sized company with flat hierarchies and a focus on the development of sustainable and future-oriented solutions.

Your profile:

- Degree Bachelor, Master or Diploma: Aircraft Design, Aerospace Engineering, Mechanical Engineering, Automotive Engineering, or similar
- Minimum 2 years work experience in design and layout of lightweight structures
- Experience in design, construction and manufacturing of composite structures
- Basic knowledge in Part 21 rules and CS22/CS23 regulations
- Fluent in written and spoken English, preferable at least basic knowledge of German

Your tasks:

- Development, design and layout of aircraft components and aircraft systems
- Component drafting, component and assembly design, drawing derivation, and generation of part lists
- Develop certification strategies in collaboration with Compliance Verification Engineers
- Preparation of compliance documents for design reviews
- Collaboration in research projects
